Motivated MCA student with foundational knowledge of Cybersecurity, Network Security, and Digital Forensics, along with hands-on experience in Python, Java, SQL, Linux, and web development. Passionate about Cybersecurity, Web Development, and Artificial Intelligence, with a strong interest in building secure, user-friendly, and innovative applications. A quick learner with strong analytical and problem-solving skills, eager to continuously enhance technical expertise and contribute effectively in entry-level Cybersecurity, AI, or Software Development roles.

PROJECTS

1. Hybrid Intrusion Detection System

Tech Stack: Python, Machine Learning, Flask, Streamlit, Scikit-learn, Nmap

- Developed a hybrid intrusion detection system to detect malicious network activities using machine learning.
- Implemented real-time traffic monitoring, anomaly detection, and an interactive dashboard for security analysis.
- Utilized feature extraction and classification techniques to improve threat detection accuracy.

2. Web Application Security Testing Platform

Tech Stack: Python, Flask, HTML, CSS, JavaScript

- Developed a web-based platform to assess web applications for common security vulnerabilities.
- Implemented security testing modules and generated vulnerability assessment reports.
- Designed an interactive user interface for efficient security analysis.

3. Phishing Website Detection System

Tech Stack: Python, Scikit-learn, Machine Learning

- Developed a machine learning model to detect phishing websites using URL-based feature extraction.
- Performed data preprocessing, feature engineering, and model evaluation to improve prediction accuracy.

4. Password Strength Analyzer

Tech Stack: Python

- Developed a password strength analyzer based on password complexity and security best practices.

- Implemented password evaluation and generated recommendations for creating stronger passwords.

TECHNICAL SKILLS

Programming Languages: Python, Java, C, SQL

Web Technologies: HTML5, CSS3, JavaScript, Flask

Cybersecurity: Network Security, Intrusion Detection Systems (IDS), Web Application Security, Vulnerability Assessment.

AI & Prompt Engineering: Prompt Engineering, AI-Assisted Development.

Security Tools: Nmap, Kali Linux

Virtualization: Oracle VirtualBox, Multi-VM Lab Setup

Operating Systems: Windows, Linux (Kali Linux, Ubuntu)

Databases: MySQL, SQLite

Version Control & IDEs: Git, GitHub, VS Code

EDUCATION

MCA- (Cybersecurity and Ethical Hacking)

Yenepoya Deemed University (2024–2026)

BCA

Mangalore University, Saint Mary's Syrian College(2021–2024)
